JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact [support@jstor.org](mailto:support@jstor.org).

## ECUADOR.

*Report from Guayaquil—Summary for month of March, 1907—  
Smallpox and yellow fever—Uncinariasis at Duran.*

Passed Assistant Surgeon Lloyd reports, April 13:

Month of March, 1907. Total number of deaths, 454, including smallpox 17 and 36 from yellow fever.

Nine vessels were fumigated during the month and 6 persons were vaccinated.

There have been no further developments in the yellow fever situation along the route of the Guayaquil and Quito Railroad.

Another case of uncinariasis is present at Duran.

## GUATEMALA.

*Report from Puerto Barrios—Inspection of vessels.*

Acting Assistant Surgeon Wailes reports as follows: Week ended April 16, 1907. Present officially estimated population, 250; general sanitary condition of this port and the surrounding country during the week, good.

The railroad hospital at Zacapa, which I visited last week, with a capacity for 200 beds had not a single white patient within its walls. In the laborers' ward were only 14 occupants. Only one death is reported for four months.

Bills of health issued to the following-named vessels:

Date.	Vessel.	Destination.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
Apr. 12	Ellis.....	New Orleans.....	35	3	17	0
16	Anselm.....	do.....	40			0

## HAWAII.

*Report from Honolulu—History of plague cases originating at Aiea, vicinity of Honolulu.*

Chief Quarantine Officer Cofer forwards the following report from the president of the Territorial board of health, under date of April 12:

*Case No. 1.*—T. I., Japanese, female. Taken ill March 24; removed March 25 to the plantation hospital and strictly isolated in a properly detached building. On the morning of March 28 the woman died, and the bacteriologist of the board of health at once proceeded to the isolated outlying hospital ward and made a post-mortem examination. He found the cause of death to have been bubonic plague. A special train was sent for the body and same was cremated on arrival at Honolulu. Guards were placed over the house and a list of all persons exposed was made. On the 29th the house and contents, as well as the inmates and all their personal effects,
